Geo-Flo Announces New Company President

Bedford, Indiana, May 28, 2015 – Geo-Flo Products Corporation announced today that Thomas Wyer has been named company president, effective immediately.

Wyer has been with Geo-Flo since 2005 working in a variety of roles, most recently as Director of Engineering for the company's geothermal flow center and hydronic product lines. Along with ten years at the company, he holds a Master's in Mechanical Engineering from Purdue University, automotive experience in product development, laboratory/testing experience, and years of teaching design and manufacturing courses at Ivy Tech Community College; Wyer has the experience needed to lead a growing company.

"Tom has proven his dedication to the success of Geo-Flo over the last ten years. He will continue to focus on engineering and operations, but will also be responsible for day to day company administration," said Tom Miller, founder and CEO of Geo-Flo. "Customers will not likely notice any changes in the day-to-day operations, as the current management team has not changed. However, the change will help Geo-Flo maintain its leadership position in the geothermal heat pump and hydronics industries by creating an even stronger management team."

ABOUT GEO-FLO

Geo-Flo Products Corporation is the industry-leading manufacturer of circulating pump modules for residential and commercial geothermal applications, as well as a complete supplier of pipe, fittings, and accessories. Since 1988, Geo-Flo has focused on solutions that create more reliable, easier to install, and more efficient products. For more information, contact Judy Moan at jmoan@geo-flo.com.
