Geo-Flo Celebrates 30 Year Anniversary

Bedford, Indiana, November 13, 2018- Geo-Flo Products Corporation recently commemorated their 30-year anniversary with employees, family, and friends at a celebration held at company headquarters in Bedford, Indiana. The event featured dinner catered by a local company, and allowed guests to tour the plant to gain an understanding of the company's operations.

Founded in November 1988 by Tom Miller, Geo-Flo has grown to become the industry leading manufacturer of geothermal pump modules, known in the industry as flow centers, and manufactures these products for all the major geothermal heat pump manufacturers in the USA. Geo-Flo concentrates on innovative engineered solutions in the geothermal and HVAC industry while maintaining the high-quality manufacturing standards observed since the beginning. Geo-Flo not only focuses on creating easier to install, more reliable and efficient products, but maintains the unparalleled customer service for which they are they are known.

Surrounded by employees, friends, and family, Trudy Wagner, Controller, and Tom Wyer, President, presented Miller with the framed and preserved original articles of incorporation signed by then Secretary of State, Evan Bayh, along with a commemorative 30-year plaque to honor this achievement. Miller was clearly filled with pride as he discussed the transformation from a small business operating from his apartment to a professional manufacturing company with world class quality standards. He seemed as enthusiastic about the future of both the geothermal industry and the company he founded, as he was in the beginning.

"Geothermal heating and cooling is by far the most reliable, cost effective, and comfortable way to heat and cool our homes and businesses, which is why our factory and one-third of our employees use this technology." Miller stated. "As consumers continue to learn about the savings and comfort of geothermal heating and cooling, the industry will grow, and Geo-Flo will be here to support it." he added.

ABOUT GEO-FLO

Geo-Flo Products Corporation is the industry-leading manufacturer of circulating pump modules for residential and commercial geothermal, and other HVAC technologies.
